Talosaur Website Build Brief

Oct 19, 2026 · @Fernando Guzman

We need a simple, clean website for Talosaur. Here's what you need to get started.

The project

Talosaur is a Texas A&M student team building a low-cost underwater robot that finds and films animals in the ocean's twilight zone (50–300 m deep). The site should explain the problem, show the team and our progress, and make it easy for people to contact us.

Reference

- **Homepage draft:** Talosaur Homepage. Use it as the starting point for layout and copy.
- **Style inspiration:** shell.com. Clean, white, simple navigation, content in cards.

Pages

A few simple pages with the same top navigation:

Page	What's on it
Home	Headline, short intro to the problem, latest progress, links to the other pages
The Problem	Why the ocean's twilight zone is hard to study
Progress	Build updates and photos, newest first
Team	Names, roles and photos
Join Us	Open positions and an application link
Contact	Email link or a simple form

Join Us page

- List the open team positions (we'll send the list), each with a line on what the role does.

- An **Apply** button that links to our application form (a Google Form is fine).
- Put a **Join us** link in the top navigation so it's easy to find.

Look

Background	White, with light gray `#F2F5F7` sections
Text	`#1B2A33`
Accent (buttons, links)	Teal `#0B5D6B`
Fonts	Headings in a Futura-style font, like Shell. Futura needs a paid license, so use Jost (free on Google Fonts, based on Futura) unless we buy it. Body: Source Sans 3.

Must-haves

- Works well on phones
- A contact email link or simple form
- Easy for us to swap photos and add progress updates later
- Photo spots can be placeholders for now; we'll send photos
- No technical details about how the robot works (code, wiring, AI)
- No em dashes (—) anywhere on the site

Setup

Your call. Plain HTML or a simple framework is fine, hosted free on Vercel, Netlify or GitHub Pages. We'll sort out a domain.

We'll send you

- [ ] Photos
- [ ] Team names and roles
- [ ] Contact email

- [ ] Social links
- [ ] Open positions and the application form link
